INTRODUÇÃO

A Secretaria da Receita Federal, por intermédio da Coordenação-Geral de Tecnologia e de Sistemas de Informação, traz ao público o presente trabalho relativo ao Comércio Exterior do Brasil, contendo apurações correspondentes ao ano de 1990.

Compõe-se o atual trabalho de 3 tomos, onde se apresentam as importações classificadas segundo seus aspectos fiscais, cambiais ou puramente mercantis.

Em princípio, os totais gerais dos mapas referem-se a mercadorias importadas diretamente para consumo ou uso interno, admitidas na Zona Franca de Manaus e nacionalizadas após entrepostamento. Executam-se os mapas IX, X e XII por suas características próprias, a saber:

i – o mapa IX considera, além das importações acima mencionadas, fluxos de mercadorias destinadas a feiras, mercadorias importadas temporariamente, a título de amostra, etc;

ii – o total do mapa X corresponde apenas aos regimes de tributação que enumera;

iii – o mapa XII totaliza apenas as importações de mercadorias com incidência de Pauta de Valor Mínimo e Preço de Referência.

Os principais conceitos adotados nesta publicação são:

I – **Local de Entrada no País (Zona Primária** – vinculada à via e transporte): a unidade da Secretaria da Receita Federal em que as mercadorias ingressem no País. Quando o local de entrada é servido por diversas vias de transporte, as importações apresentam-se desdobradas segundo os pontos de entrada (portos marítimos, fluviais e lacustres, e aeroportos).

II – **Local de Desembaraço Aduaneiro das Mercadorias:** a unidade da Secretaria da Receita Federal que efetuou o desembaraço aduaneiro das mercadorias estrangeiras. Os casos de trânsito aduaneiro foram computados na unidade da SRF em que se efetivou o desembaraço final da mercadoria, independentemente do local de seu ingresso no País.

III – **Domicílio Fiscal dos Importadores:** a unidade da Secretaria da Receita Federal que jurisdiciona o estabaelecimento importador. Neste conceito, as importações efetuadas por pessoas físicas foram alocadas ao domicílio tributário do contribuinte e, no caso de estrangeiros não cadastrados na Secretaria da Receita Federal, atribuiu-se como domicílio tributário o local de ingresso no País da mercadoria importada (conceito do quadro I).

IV – **Nacionalidade dos Veícilos Transportadores** (vinculada às vias de transporte): a nacionalidade ("bandeira") do veículo transportador. Adotou-se como via de transporte, em todos os casos, aquela através da qual a mercadora ingressou no país, mesmo quando, já em território brasileiro, tenha sido utilizada outra via de transporte para conduzir a mercadoria desde o ponto de ingresso até o local de desembaraço aduaneiro. As importações através de via postal foram classificadas genericamente, atribuindo-se-lhes a designação "Colis-Posteaux", em lugar daquela nacionalidade.

V – **Natureza Cambial:** a forma de cobertura cambial das importações desdobradas nos diversos prazos de pagamento (quando com cobertura cambial) e nas várias formas de operação (quando sem cobertura cambial). Contém, igualmente, a identificação dos órgãos financiadores internacionais, assim como a personalidade jurídica do importador nacional.

VI – **Regime de Tributação:** as formas de incidência dos tributos aduaneiros (alíquotas "ad valorem", preço de referência , etc...), as modalidades de pagamento desses tributos (integral, redução, isenção, etc...) e a legislação pertinente (ALALC, GATT, CPA, CDI, etc...).

Cabe destacar que em alguns quadros apresentados no Tomo I foi adotada a classificação segundo o uso ou destino econômico das mercadorias (CUODE), elaborada pela CEPAL, com base na Codificação Uniforme do Comércio Internacional (CUCI), introduzida nesta publicação para propiciar uma nova ótica de análise da pauta das importações brasileiras, sendo mantida a nomenclatura Brasileira de Mercadorias (NBM) para as tradicionais tabulações "países por mercadorias" e "mercadorias por países". Nesta última, foram acrescentados os conceitos de "preço médio FOB" e "Preço médio final", calculados em US$/Kg e informados em notação exponencial; a base de calculo do "Preço médio FOB" foi o próprio valor FOB da Importação, e o "Preço médio final" o valor CIF acrescido dos tributos aduaneiros pagos.

No caso de peso líquido inferior a 1Kg, consta, como peso líquido, zero e utiliza-se, para efeito de calculo do "Preço médio FOB" e do "Preço médio final", o peso líquido equivalente a 0,5 Kg.

Brasília, janeiro de 1994.
